MyDomainsHub

Five lessons from building MyDomainsHub.

What selling domains in naira has taught us so far.

From the founder

Swipe →

Lesson 1

A timeout isn’t a failure

1. A registration that times out may still have worked.
2. Sending it again could charge twice.
3. So we never resend: we read the registry and record what happened.

Lesson 2

A wrong price is worse than none

1. A price is the supplier’s cost, today’s exchange rate and our margin.

2. If any of them is missing, we show no price.

3. A person checks big exchange-rate moves before they’re used.

Lesson 3

Show what year two costs

1. Every price comes with its renewal price.

2. In search, the cart, checkout and on your receipt.

Lesson 4

Say only what the product does

1. Every sentence on our site describes something it does today.

2. When the product changes, the words change with it.

Lesson 5

Make leaving easy

1. Unlock your domain and get its transfer code yourself.
2. Both ask for your second factor.
3. The code is shown once and stored nowhere.

MyDomainsHub

Building in public, one honest decision at a time.
